Kampala, Uganda

I am a committed and experienced cybersecurity specialists with great communication skills. I care about businesses and love to see business grow to meet their business goals while averting any foreseeable threats to business.

Training and Certifications

- **Google Cyber Security Certificate:** Includes cybersecurity audit, frameworks, controls, Linux, MySQL, and Python hands-on labs.

Practical Projects

- Carried out cybersecurity audits, controls, compliance checklists and risk assessments for Botium Toys
- Conducted an enterprise wide NIST Cyber Security assessment as part of GRC Mastery training course.

Professional Experience

Designx Tech Africa

2024 — Present

Cybersecurity Specialist

Cybersecurity Specialist at Designx Tech Africa. Duties include:

- Carrying out cybersecurity audits, controls, compliance checklists and risk assessments.
- Analyzing existing systems and network structure, studying devices used, and testing security measures like firewalls and software permissions.
- Reporting their findings to business leaders and making relevant recommendations.
- Collaborating with other departments to ensure all colleagues understand the organization's cybersecurity best practices.
- Implementing and modifying cybersecurity software that helps meet business goals.
- Identifying potential or real cyber incidents and effectively applying solutions to any breaches that may occur.
- Creating and implementing security audits across hardware and software.
- Ensuring that networks and computer systems are up to date.

- Designing firewalls and other security measures to ensure that systems are compliant with the relevant data privacy and protection regulations.
